Profile

I am a junior **.NET Full Stack developer**, fluent in **C#** and **Angular**, with proficiency in **English** and **Russian**.
I am eager to collaborate and contribute within a team environment.

Courses

Najot Ta'lim

Studying at Najot Talim's .NET course was an exhilarating experience that propelled me into the world of software development. From the foundational principles of C# to the intricacies of ASP.NET, every lesson was a stepping stone towards mastery. The instructors at Najot Talim were not just teachers; they were mentors who nurtured my passion for coding and inspired me to push beyond my limits.

2023 – 2024
Tashkent,
Uzbekistan

Skills

C#	Angular
.NET Core	TypeScript
HTML&CSS	PostgreSQL
MVC	Telegram Bot

Projects

Auto-Service ☑

- The Car Service project is a comprehensive full-stack application developed collaboratively with a team. Its primary goal is to streamline the process of managing car services, providing a seamless experience for both customers and service providers. Here's an overview of the project components:

Rumassa ☑

- Rumassa is your one-stop shop for all your fitness needs! We're an e-commerce platform dedicated to providing high-quality gym supplements like proteins, vitamins, and more to help you achieve your fitness goals.
- Front-end ☑
- Back-end ☑

Resume-Viewer

- **Resume Viewer** empowers HR professionals to make faster and more informed hiring decisions. This innovative web application simplifies resume analysis by offering the following features:
- **Effortless Resume Upload:** HR users can easily upload candidate resumes for quick processing.
- **Keyword-Based Analysis:** Search for specific skills and experience using keywords, allowing you to focus on qualified candidates.
- **Enhanced Efficiency:** Save time by filtering through a pool of resumes based on relevant criteria.
- **Improved Candidate Selection:** Identify top contenders based on their skills and experience match with the job requirements.

Other Projects:

- You can see my all projects in my github profile. There many different projects. Starting with telegram bots ending with big projects
